Revised May 19,2020: This guide supersedes all previous versions of the DCJS-1508/NYSP CB-7 for reporting missing persons, in accordance with the provisions of New York State Executive Law Sections §837-e, §837-f, §837-f-1, f-2, and § 838.

NYS Missing Persons Clearinghouse

The Missing Persons Clearinghouse is staffed by professionals with extensive experience handling missing person cases. They support law enforcement officials investigating cases involving children under 21, college students and vulnerable adults who have gone missing. The Clearinghouse:

- Provides support to family members of children, college students and vulnerable adults who are missing, and offers community education programs;
- Administers three alerts that quickly disseminate information about a child, college student or vulnerable adult who is missing and at risk of harm;
- Publicizes cases at the request of family members and law enforcement online, through social media and the distribution of printed and electronic posters;
- Provides short- and long-term investigative assistance to law enforcement; and
- Trains police officers and develops and distributes procedures and best practice guides for law enforcement agencies.

The Clearinghouse operates a toll-free hotline for case intake and leads:
800-346-3543

Alert Program

The Clearinghouse activates three types of alerts:

Missing Child Alert: Activated when a child younger than 21 is missing and believed to be in danger due to special circumstances, such as a cognitive impairment or medical condition, that place them at serious risk of harm or death.

Missing College Student Alert: Activated when a college student of any age is missing and is deemed to be at credible risk of harm or death.

Missing Vulnerable Adult Alert: Activated when an individual who is 18 or older; has a cognitive disorder, brain injury or mental disability; is reported missing; and is at credible risk of harm. This includes individuals with autism, dementia or Alzheimer's disease.

Alerts are only activated at the request of police agencies. Family members should contact their local agency as soon as their loved one goes missing.

Within minutes of an alert activation:

- Information about the person is distributed to police agencies, the media, Thruway plazas and toll barriers, airports, bus terminals, train stations, hospitals and other locations.
- Details are displayed on highway signs for up to eight hours.
- Information is shared via Facebook (www.facebook.com/nyspublicsafety), Twitter (@NYSPublicSafety) and online (www.criminaljustice.ny.gov).
- NYAlert subscribers are notified immediately. Visit www.alert.ny.gov or call 888-697-6972 to subscribe.

Alerts can remain active for up to 72 hours. If the individual remains missing after that three-day period, case details are posted to www.criminaljustice.ny.gov/missing.

AMBER Alerts, administered by the New York State Police, are activated for abducted children younger than 18 who are believed to be at risk for serious bodily harm or death. www.amber.ny.gov

The Missing Child Alert, Missing College Student Alert and Missing Vulnerable Adult Alert or non-alert assistance can be requested via the eJustice Integrate Justice Portal (IJ Portal) system, in the missing person record modify screen.

The screenshot displays the 'Missing Modify' interface within the eJusticeNY Integrated Justice Portal. The top navigation bar includes 'Home', 'People', 'Property', 'Intelligence', 'Resources', 'Notifications', and 'NEEDS A HOME'. The breadcrumb trail is 'People » Missing » Modify'. The main form area contains the following fields and options:

- Type of Assistance Requested:** A dropdown menu with the following options: 'No Assistance Required', 'Missing Child Alert', 'Missing College Student Alert', 'Missing Vulnerable Adult Alert', 'Missing Child Non-Alert Case', 'Missing College Student Non-Alert Case', and 'Missing Vulnerable Adult Non-Alert Case'.
- Missing Person Photograph:** A field for uploading a photograph.
- * Originating Agency (ORI):** A text input field with the value '0990'.
- New York State ID No. (NYSID):** A text input field.
- Linking Agency (LKI):** A dropdown menu with the option 'No Assistance Required'.

Overview of DNA

DNA is found in nearly every cell in the human body in a core structure called the nucleus. DNA represents a 50/50 mixture from the DNA of an individual's mother and the DNA of the individual's father. With the exception of identical twins, everyone has a different DNA profile.

Another form of DNA is found in our cell's mitochondria. Unlike traditional DNA found in the cell's nucleus, mitochondrial DNA (mtDNA) is not a mixture of DNA from the mother and father, but represents only DNA from the mother. This means that all siblings with the same mother share the same mtDNA. Even though mtDNA is not as unique to an individual as traditional DNA found in the cell's nucleus, it has a different advantage. While nearly every cell in the body has one nucleus, the cell will have 50-100 mitochondria. This means that mtDNA is less susceptible to breakdown from heat or other environmental conditions and can be a valuable tool for the identification of human remains when it is not possible to obtain a nuclear DNA profile.

Importance of DNA in Missing Person Cases

Collecting family DNA profiles maximizes the information which investigators can use to develop useful leads to resolve identifications of missing and unidentified persons. Law enforcement agencies involved in an active missing person case (case in which a missing person report has been filed) are strongly encouraged to collect reference DNA samples from two or more close biological relatives (see list below) of the missing person. DNA technology can provide valuable information to assist in determining the source of unidentified human remains and may provide a critical investigative link to a missing person case.

The **Family Reference Sample Collection Kit** is used to obtain DNA samples. DNA samples submitted by family members are used **solely** to help locate or identify the missing person and are not used for any other purpose. Relatives of missing persons voluntarily contribute reference DNA samples to identify a missing person and the DNA record of a relative of a missing person will be removed at the request of the individual who voluntarily provided the reference sample.

Reference DNA samples that are submitted by law enforcement agencies without the appropriate documentation may not be acceptable for analysis and entry in CODIS.

Family reference samples can be collected from:

- Biological Child
- Biological Father
- Biological Mother
- Biological Sibling
- Deduced Missing Person
- Maternal Relative
- Missing Person Paternal Relative

To obtain a Family Reference Sample Collection Kit, contact the New York State Division of Criminal Justice Services - Office of Forensic Services at (518) 457-1901.

NamUs

The National Missing and Unidentified Persons System (NamUs) is a clearinghouse for information related to missing persons, unidentified decedents and unclaimed persons across the United States, as well as a system of forensic and analytical resources to help resolve these cases. The NamUs databases, located online at www.namus.gov, are free, Internet-based data repositories that can be searched by medical examiners, coroners, law enforcement personnel and the general public to help solve missing and unidentified person cases.

When a new missing or unidentified person case is entered into the NamUs database and validated, the system automatically performs comparisons, searching for matches or similarities among missing and unidentified persons. Most registered NamUs users – including law enforcement personnel, medical examiners, coroners and case managers – are able to view system-generated matches and adjust matching criteria to filter results. In addition, users can perform manual searches of the NamUs databases to locate potential matches based on unique features such as scars, marks, tattoos, jewelry and clothing descriptions, etc.

- The NamUs **Missing Person (MP) Database** contains information related to missing persons that can be entered by anyone; however, before a missing person case is published for public viewing, it must be vetted with the appropriate Criminal Justice Agency (CJA) and that agency must provide NamUs with permission to publish the case. The NamUs MP database provides users with a variety of resources such as the ability to print missing person posters, receive free biometric collection assistance, and search the NamUs databases for potential associations between missing, unidentified and unclaimed persons. The NamUs MP database can be accessed directly from www.FindTheMissing.org.
- The NamUs **Unidentified Person (UP) Database** contains information related to decedents whose bodies have not been identified, as well as living persons whose identity is unknown due to memory impairments and/or other circumstances. UP cases are entered by medical examiners and coroners and their designees throughout the United States. NamUs allows all stakeholders to search the UP database using a variety of distinct features or advanced search options, including characteristics such as sex, race, distinct body features, dental information, etc. The NamUs UP database can be accessed directly from www.IdentifyUs.org.
- The NamUs **Unclaimed Person (UCP) Database** contains information related to deceased persons who have been identified by name but for whom no next of kin has been identified or located to claim the body for burial or other disposition. UCP cases can be entered only by CJAs and their designees, but the database is searchable by the public. Once next of kin has been located and verified by the case owner, cases should be removed from public view unless there is an investigative reason to do otherwise. The NamUs UCP database can be accessed directly from www.ClaimUs.org.

**Missing Person Record NamUs Certification
What You Need to Know**

The Law:

§ 837-e Statewide Central Register for Missing Children.

1-b. The division shall transmit the report of the missing child to the National Missing and Unidentified Persons System (NamUs) no later than thirty days after entry of a report of a missing child into the register whenever circumstances indicate that the missing child may be at immediate risk of death or injury, or may be a match to a record maintained in the NamUs unidentified person database and **within one hundred eighty days in any other case.**

§ 837-f-2. Missing adults

The division shall transmit the report of the missing adult to the National Missing and Unidentified Persons System (NamUs) within thirty days after entry of a report of a missing adult into the register whenever circumstances indicate that the missing adult may be at immediate risk of death or injury, or may be a match to a record maintained in the NamUs unidentified person database and **within one hundred eighty days in any other case.**

eJustice Portal Requirement:

The New York State Division of Criminal Justice Services (DCJS) requires the entering agency of missing person records in the eJustice Portal Missing Person Record System, which are active 180 days or more to certify that the record data should or should not be transmitted to NamUs. Once the certification has been completed, the record data will be transmitted via DCJS to NamUs. Certification is completed in the modify screen.

Fields in the eJustice Portal Missing Person Record that will be transmitted to NamUs

WPR Number	Height
ORI Case Number (OCA)	Weight
Missing Person Condition	Ethnicity
Missing Person Circumstance	Last Known Address OR Missing from Address
Last Name	Case Details/MISC. (MIS)
First Name	Investigating Officer: Last Name, First Name,
Sex	Telephone, E-mail
Race	Last Contact Date
Eye color	Caution/Medical Condition (CMC)
Hair Color	Scars/Marks/Tattoos (SMT)
Birth Date (DOB)	Clothing Description
Missing Person Photograph	

NamUs Record Certification Process

- Two NamUs record certification messages are sent to the eJustice Portal Agency Inbox for each missing person record active more than 180 days
 - 160 Days – 1st Certification Message to Agency Inbox
 - 170 Days – 2nd Reminder Message to Agency Inbox
 - 180 Days – Unable to modify until certified
- Records are only certified once

What You Need to Do:

- Monitor the Agency Inbox for record certification notifications
- When a record certification notification is received:
 - Review the record
 - Confirm with the assigned investigator that the person is still missing and the information in the record is correct
- If the record data will be certified to be transmitted to NamUs:
 - Retrieve the record on the modify screen of the eJustice Portal Missing Person System
 - Add the additional required information if it is not already in the record:
 - Last Known Address: City and State
 - Investigating Officer: Name, Email, Telephone Number
 - Place a checkmark in the box:
 - **I authorize to transmit the record data to NamUs**
 - Submit the record.
 - Once the record has been certified to transmit the data the certification cannot be removed
- If the record data will not be certified to be transmitted to NamUs:
 - Retrieve the record on the modify screen of the eJustice Portal Missing Person System
 - Place a checkmark in the box:
 - **I do not authorize to transmit the record data to NamUs**
 - Submit the record
 - If the do not authorize box is marked, the NamUs certification can be modified at any time to authorize transmission of the record data.

GENERAL GUIDELINES FOR HANDLING MISSING PERSON CASES

Children: When investigating a report of a missing child (under the age of 21), a report **must** be taken and biographical information **must** be entered into DCJS/NCIC files *immediately (within two hours)*.

College Students: When investigating a report of a missing college student (any age) and there is any suspicion that his or her well-being may be in jeopardy, a report **must** be taken and biographical information **must** be entered into DCJS/NCIC files immediately.

Vulnerable Adults: When investigating a report of a missing vulnerable adult or that an unidentified living person may be a missing vulnerable adult, a report **must** be taken and biographical information **must** be entered into DCJS/NCIC files immediately.

Adults: When investigating a report of a missing adult and there is any suspicion that his or her well-being may be in jeopardy, a report **must** be taken and biographical information **must** be entered into DCJS/NCIC files immediately.

Entering the record into the eJusticeNY Integrated Portal: When entering a missing person record use the most appropriate condition and circumstance.

Missing Persons Conditions via DCJS eJusticeNY Integrated Portal System	
Condition	Description
Disabled	A person of any age who is missing and under proven physical/mental disability subjecting himself/herself to personal and immediate danger.
Disaster Victim	A person of any age who is missing after a catastrophe.
Endangered	A person of any age who is missing under circumstances indicating that his/her physical safety may be in danger.
Involuntary	A person of any age who is missing under circumstances indicating that the disappearance may not have been voluntary, i.e., abduction or kidnapping.
Juvenile	A person under the age of 18 who is missing and not declared emancipated by the law and does not meet the entry criteria set forth in above listed condition types or a missing person between the ages of 18 and under 21 who meet the Missing Person Circumstances of Adult Federally Required Entry.
Other	A person age 18 and older not meeting the criteria for entry in any other category who is missing and for whom there is a reasonable concern for his/her safety.
Vulnerable Adult	A person 18 years or older who is missing and has a cognitive impairment, mental disability or brain disorder and it is believed the missing individual is at a credible risk of harm. (Because this Missing Person Condition exists only in the eJusticeNY IJ Portal, the record will default to Disabled when uploaded to NCIC.)

Missing Persons Circumstance via the DCJS eJusticeNY Integrated Portal	
Required for a missing person record under age 18 or for missing person condition of Juvenile	
Circumstance	Description
Abducted by Non-custodial Parent	Child who is taken or abducted by a parent who does not have court ordered custody.
Acquaintance Abduction	Child who is taken or abducted against their will by a person known to the child or family.
Adult Federally Required Entry	Title 42, United States code (USC), Section 5779 (a), states that agencies are required to enter records into the NCIC Missing Person File for missing individuals under the age of 21. In order to comply with this federal law (Suzanne's Law) the Missing Person Circumstance of Adult Federally Required Entry is used with the Missing Person Condition of Juvenile.
Circumstances Unknown	A child who is reported missing but there are insufficient facts to determine the circumstances.
Familial Abduction	A child who is taken, detained, concealed, enticed away, or retained by a parent/family member or other person at the request of the parent.
Lost/Wandered Away	A child who is reported to have strayed or wandered away and whose whereabouts is unknown.
Runaway	A child under 18 years of age who is reported missing but has left of their own free will or has been rejected or "thrown away" by their family.
Stranger Abduction	A child who is taken or abducted against their will by an unknown person or a known person who is not a family member.

Initial Entry Report - A copy of this report is located on pages 11 and 12. The investigating officer should complete the report, immediately enter information into DCJS/NCIC files and file the report in accordance with agency procedures. To expedite entry of information into DCJS/NCIC files, the format of the Missing Person Report (including codes) follows the e-JusticeNY Integrated Justice Portal screen formats.

Race Code

Value	Definition
I	American Indian or Alaskan Native - a person having origins in any of the original peoples of the Americas and maintaining cultural identification through tribal affiliations or community recognition
A	Asian or Pacific Islander - a person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian sub-continent or the Pacific Islands
B	Black - a person having origins in any of the black racial groups of Africa
W	White - a person having origins in any of the original peoples of Europe, North Africa, or Middle East
U	Unknown

If the missing person is a child, college student or vulnerable adult - The NYS DCJS MPC’s “Runaway Intake Report, Family Abduction Intake Report or Missing Vulnerable Adult Intake Report” forms (located in the Appendix) should be completed. Upon receipt, they should be reviewed to ensure that information is complete and accurate. The original forms should be retained by the investigating law enforcement agency and copies should be forwarded to NYS DCJS/MPC via fax, email or mail.

Personal Descriptors/Jewelry Type - Information about personal descriptors and jewelry type should be obtained from the person making the missing person report. This should be done as soon as possible and information should be recorded on the Personal Descriptors Form (pages 15 - 26) and Jewelry Type Form (page 27). Ensure that all information is promptly added to the DCJS/NCIC missing person record.

Medical, Dental and Optical Information - Ensure that the Medical Records Authorization Form (page 14) is completed and signed by a parent, guardian or next of kin. A police officer or a parent/guardian must then take the forms to the missing person's physician, dentist and/or eye care provider and request that all available information, including x-rays, be provided. Ensure that all information is promptly added to the DCJS/NCIC missing person record.

Dental History Information - Retain the authorization in agency files for 30 days. If the person is still missing after 30 days, take the authorization form and the remainder of the Dental History Section (pages 36 - 43) to the missing person's dentist. The dentist should be directed to return the completed form and related records for entry into DCJS/NCIC files. NYS Executive Law §838 requires that a dentist provide requested information within 10 days.

When dental history information is received from a dentist, ensure that all information is promptly added to the DCJS/NCIC missing person record. After information is entered by an investigating law enforcement agency, all dental charts, records, x-rays, photographs and models should be forwarded to NYS DCJS/MPC for evaluation and storage. If preferred, records can be forwarded to NYS DCJS/MPC for entry.

If no parent, guardian or next of kin is available to complete the authorization, a police or peace officer may submit the authorization; provided he or she executes a written declaration stating that an investigation is being conducted to locate the missing person and the dental records are necessary for the exclusive purpose of furthering the investigation.

Miscellaneous Data - Any other information available about the missing person should be documented on this form (page 28). Ensure that all information is promptly added to the DCJS/NCIC missing person record.

External Characteristics Body Diagrams - These sheets (pages 29 - 32) should be used by the parents, legal guardian, next of kin, complainant, medical professional and/or investigating officer(s) to indicate precise locations of scars, marks, tattoos and other characteristics. Ensure that all information is promptly added to the DCJS/NCIC missing person record.

Internal Characteristics Coding Sheet - This sheet (page 33) should be used by the parents, legal guardian, next of kin, complainant, medical professional and/or investigating officer(s) to describe additional physical characteristics that may not be readily visible, including surgeries and missing organs. Ensure that all information is promptly added to the DCJS/NCIC missing person record.

Images - Images of the missing person (i.e., photos, signature) should be obtained, entered into DCJS/NCIC and associated with the missing person record.

When the missing person is located – cancel the record via the eJusticeNY Integrated Justice Portal. Always use the cancel reason lookup and choose the appropriate description.

Cancel Code	Cancel Reason Description	Definition
I	Missing person record entered in error or determined to be invalid	Entered in error or invalid should be used when a record was entered in error or determined to be a duplicate. Example: Two agencies enter the same missing person in separate entries
Q	Missing person recovered, arrested, non-victim	The missing person was arrested but was not a victim of criminal activity or exploitation while missing.
S	Missing person recovered, arrested, victim of criminal activity or exploitation while missing	The missing person was arrested and was victimized while missing.
T	Missing person recovered, deceased	The missing person was deceased when located.
P	Missing person recovered, not arrested, non-victim	The missing person was recovered by police but was not arrested and was not a victim of exploitation while missing.
R	Missing person recovered, not arrested, victim of criminal activity or exploitation while missing	The missing person was recovered by police, the missing person was not arrested and was a victim of criminal activity or exploitation while missing.
U	Missing person voluntarily returned home	The missing person voluntarily returned home.

DCJS will purge files and return original medical records, dental charts, x-rays, photographs and models to respective medical and/or dental offices. Fingerprints and other records will be returned to the investigating law enforcement agency or family members, if appropriate.

ADDITIONAL NOTES

Records of missing children/juveniles will remain in NYS DCJS MPC and NCIC missing person files until the originating agency cancels the record, or another agency places a locate against the record.

NYS Executive Law §837 requires NYS DCJS/MPC to flag the school and birth records of all missing children who were born or attended school in New York State. In order to comply with flagging requirements, NYS DCJS/MPC must include the name and address of the child's school or school district, place of birth (city/state/country), mother's maiden name, and father's name, if available. **It is extremely important that this information be provided when entering the child into DCJS/NCIC files, since flagging letters are generated from entries made by investigating law enforcement agencies.**

NYS DCJS/MPC cannot publicize a case unless the investigating law enforcement agency confirms authorization by a parent or legal guardian by selecting the Authorization to Publicize checkbox in the Missing Person Record modify screen when MPC assistance is requested.

- Gold tooth (GOLD TOOTH)
- Silver tooth (SLVR TOOTH)
- Upper denture only (DENT UP)
- Lower denture only (DENT LOW)
- Upper and lower denture (DENT UP LO)

LARYNX

- Artificial Larynx (ART LARYNX)

SHOULDERS

- Artificial shoulder joint (ART SHLD)
- Artificial left shoulder (ART L SHLD)
- Artificial right shoulder (ART R SHLD)

TORSO

- Artificial breast, nonspecific (ART BRST)
- Breast implant, left and right (ART BRSTS)
- Breast implant, left (ART L BRST)
- Breast implant, right (ART R BRST)

ARMS

- Artificial arm, nonspecific (ART ARM)
- Artificial left arm (ART L ARM)
- Artificial right arm (ART R ARM)

ARMS - CONTINUED

- Artificial elbow joint (ART ELBOW)
- Artificial left elbow (ART L ELB)
- Artificial right elbow (ART R ELB)
- Artificial hand, nonspecific (ART HAND)
- Artificial left hand (ART L HND)
- Artificial right hand (ART R HND)

LEGS

- Artificial leg, nonspecific (ART LEG)
- Artificial left leg (ART L LEG)
- Artificial right leg (ART R LEG)
- Artificial hip joint, nonspecific (ART HIP)
- Artificial hip joint, left (ART L HIP)
- Artificial hip joint, right (ART R HIP)
- Artificial knee joint, nonspecific (ART KNEE)
- Artificial knee joint, left (ART L KNE)
- Artificial knee joint, right (ART R KNE)
- Artificial foot, nonspecific (ART FOOT)
- Artificial left foot (ART L FT)
- Artificial right foot (ART R FT)

WALKING AIDS

- Cane (CANE)
- Crutches (CRUTCHES)
- Wheelchair (WHEELCHAIR)

BRACES

- Back brace (BRACE BACK)
- Neck brace (BRACE NECK)
- Brace, one arm, nonspecific (BRAC ARM)
- Brace, left arm (BRAC L ARM)
- Brace, right arm (BRAC R ARM)
- Brace, left and right arms (BRA LR ARM)
- Brace, one leg, nonspecific (BRAC LEG)
- Brace, left leg (BRAC L LEG)
- Brace, right leg (BRAC R LEG)
- Brace, left and right legs (BRA LR LEG)

Deafness

- Deaf, one ear, nonspecific (DEAF EAR)
- Deaf, left ear (DEAF L EAR)
- Deaf, right ear (DEAF R EAR)
- Deaf, left and right ears (DEAF)
- Deaf-mute (DEAF MUTE)

Deformities

EARS

- Cauliflower ear, nonspecific (CAUL EAR)
- Left cauliflower ear (CAUL L EAR)
- Right cauliflower ear (CAUL R EAR)

FACE

- Deviated septum (DEV SEPTUM)
- Cleft lip (CL LIP)
- Cleft palate (CLEFT PAL)
- Mute, person is mute not deaf (MUTE)
- Protruding jaw, nonspecific (PROT JAW)
- Protruding upper jaw (PROT U JAW)
- Protruding lower jaw (PROT L JAW)
- Extra tooth/teeth, nonspecific (EXTR TTH)
- Extra tooth/teeth, upper jaw (EXTR U TTH)
- Extra tooth/teeth, lower jaw (EXTR L TTH)

TORSO

- Extra breast, nonspecific (EXTR BRST)
- Extra left breast (EXTR LBRST)
- Extra right breast (EXTR RBRST)
- Extra center breast (EXTR CBRST)
- Extra nipple, nonspecific (EXTR NIP)
- Extra nipple, left (EXTR L NIP)
- Extra nipple, right (EXTR R NIP)
- Extra nipple, center (EXTR C NIP)
- Humpbacked (HUMPBACKED)
- Extra vertebra(e), nonspecific (EXTR VRT)
- Extra cervical vertebra(e) (EXTR C VRT)
- Extra lumbar vertebra(e) (EXTR L VRT)

ARMS

- Crippled arm, nonspecific (CRIP ARM)
- Crippled left arm (CRIP L ARM)
- Crippled right arm (CRIP R ARM)
- Crippled hand, nonspecific (CRIP HAND)
- Crippled left hand (CRIP L HND)
- Crippled right hand (CRIP R HND)
- Crippled finger, nonspecific (CRIP FGR)
- Crippled left finger (CRIP L FGR)
- Crippled right finger (CRIP R FGR)
- Extra finger(s), nonspecific (EXTR FGR)
- Extra finger(s), left hand (EXTR L FGR)
- Extra finger(s), right hand (EXTR R FGR)

LEGS

- Short leg, nonspecific (SHRT LEG)
- Shorter left leg (SHRT L LEG)
- Shorter right leg (SHRT R LEG)
- Crippled leg, nonspecific (CRIP LEG)
- Crippled left leg (CRIP L LEG)
- Crippled right leg (CRIP R LEG)
- Crippled foot, nonspecific (CRIP FOOT)
- Crippled left foot, includes clubfoot (CRIP L FT)
- Crippled right foot, includes clubfoot (CRIP R FT)
- Crippled toe, nonspecific (CRIP TOE)
- Crippled left toe(s), includes webbed toes (CRIP L TOE)
- Crippled right toe(s), includes webbed toes (CRIP R TOE)
- Extra toe(s), nonspecific (EXTR TOE)
- Extra toe(s), left foot (EXTR L TOE)
- Extra toe(s), right foot (EXTR R TOE)

Eye Disorders

- Blind, one eye, nonspecific (BLND EYE)
- Blind, left eye (BLND L EYE)
- Blind, right eye (BLND R EYE)
- Blind, both eyes (BLIND)
- Cross-eyed (CROSSEYED)
- Cataract, nonspecific (CATARACT)
- Cataract, left eye (CATA L EYE)
- Cataract, right eye (CATA R EYE)
- Glaucoma (GLAUCOMA)

Fractured Bones - FRESH (FRC)

MISCELLANEOUS DATA

Miscellaneous data regarding the missing person may be added. This information may include, but is not limited to, any of the following:

1. Nicknames the missing person may go by
2. Clothing description (size, color, style, laundry marks)
3. Shoes (size, style, color)
4. Smoker (pipe, cigar, cigarette; brand)
5. Tobacco chewer (brand)
6. Fingernails (polish, length, biter)
7. Possible destination
8. Amount of money in possession
9. Medication in possession
10. Left handed
11. Right handed
12. Explanation/description of scars, marks, tattoos, and physical characteristics
13. Conditions under which a juvenile is listed as missing
14. Child is missing under suspicious circumstances, and/or child is believed to be in a life-threatening situation.

Internal Characteristics Coding Sheet

This sheet may be used by the next of kin or physician to list or describe additional characteristics that may not be readily visible, such as surgical procedures and missing organs. Information documented on this sheet should be coded by the NCIC operator and added to the missing person record.

Images

Images that may assist in identifying a missing person should be entered into NCIC and associated with the missing person record.

The types of images that can be stored for a missing person are mugshot, signature, and identifying images.

Mugshot: Only one mugshot may be entered per record.

Signature: Only one signature may be entered per record.

Identifying Images: Not more than ten identifying images (other than mugshot and signature) may be associated with one record.

CODING DENTAL CHARACTERISTICS

Letter to Dentist

Dear Doctor:

Because it is believed that you have treated the subject of this report, your assistance with the enclosed dental report is requested. Your careful attention to the information requested in the dental report may aid in the identification of the person who has been reported missing.

A worksheet for your notes in regard to each tooth is contained in this packet. Using this worksheet will enable you to combine the information shown in the dental records and radiographs to provide an accurate dental profile. Once you have completed the worksheet, you may use these notes to easily transfer the information to the National Crime Information Center (NCIC) Missing Person Dental Report.

This report is designed to facilitate the collection of dental data to be entered into the NCIC, which will compare these dental data to dental characteristics stored in the NCIC Unidentified Person File to develop a candidate list of potential matching records.

Your careful examination of all available dental records will ensure you create a dental profile that will provide key information used in the identification process. Under most circumstances, it should not take you more than a few minutes to complete this report.

If you have any questions regarding the reporting of a condition, contact the **FBI's CJIS Division at (304) 625-3000.**

Dental Data Checklist

(to be completed by dentist)

- All dental information has been collected and reviewed (including, but not limited to all original radiographs, treatment records, dental photographs, and dental models).
- Photographs showing missing persons teeth have been collected from family and/or friends.
- Dental records and photographs collected have been given to the investigating agency.
- Completed Dental Condition Worksheet. (See page 29.)
- Completed NCIC Missing Person Dental Report. (See page 30.)

DENTAL CONDITION WORKSHEET

(to be completed by dentist)

You should fill out this chart following your complete review of all available dental records and radiographs. You should number the teeth following the format of the Universal numbering system with tooth #1 being the upper right third molar, tooth #16 being the upper left third molar, tooth #17 being the lower left third molar and tooth #32 being the lower right third molar. In your descriptions of the restorations present, you should include the surfaces involved (M, O, D, F, L), the restorative material used, such as amalgam, gold, porcelain, composite, temporary cement and any other conditions that may be observed such as endodontic treatment, pin retention, orthodontic brackets or bands. You must not leave any tooth numbers blank. If the tooth has no restorations, note it as "virgin" or "present, no restoration." Note other significant dental information at the bottom of this chart or on an additional sheet of paper, which you should attach to this worksheet.

SECTION 4

DENTAL REMARKS

- ALL** (All 32 teeth are present and unrestored) **UNK** (No dental information available)

General Procedures for Coding the Report

(to be completed by dentist)

Section 1:

- Complete the Patient's Name field as reflected in the dental records.
- The Age at Disappearance and NCIC # fields should be completed by the investigating agency.
- The Completed by, Date Completed, Address, Telephone #, Email Address, X-Rays Available, Dental Models Available, and Dental Photographs Available fields should be completed by the individual filling out the dental report.

Section 2:

- **If no dental information is available**, go directly to Section 4 and check the UNK box. Do not enter any codes in the tooth fields.
- **If all 32 teeth are present with no restorations**, go directly to Section 4 and check the ALL box.
- Review pages 32–36 prior to completing the Dental Characteristics Section of the dental report.
- Tooth numbers are based on the Universal System. The corresponding Federation Dentaire Internationale (FDI) System numbering is depicted in parenthesis.
- Use all available dental evidence to capture the most accurate dental profile.
- Enter the appropriate code(s) next to the corresponding tooth number, 01–32, on the dental report.
- Each tooth must have one or more codes entered except when ALL or UNK is used in Section 4.

Section 3:

- Dental Codes. A more detailed explanation of these codes and their use is provided on page 32.

Section 4:

- Used for coding ALL or UNK.
 - If ALL is marked, NCIC will automatically code all teeth as V.
 - If UNK is marked, NCIC will automatically code all teeth as /. A dental comparison will not be performed by NCIC when this box is marked.
- Used for additional dental characteristics not captured in the dental codes listed in Section 3, for example, dental implants, removable dentures, orthodontic appliances. Specific tooth numbers are not always necessary, and key descriptive words are preferred.

Dental Codes and Descriptions

Primary Dental Codes - *One or more codes must be entered for each tooth.*

Code	Description
V	Virgin. Default code for Missing Persons. Tooth is present or assumed to be present and unrestored. This includes unerupted teeth, such as wisdom or deciduous teeth. If no information is available for a particular tooth, this code should be used as it is assumed that all teeth are present (erupted or unerupted) and unrestored when they develop. This code is also used when a tooth has been restored but it is impossible to determine which surface has been restored (most common example of this is the location of a pit type filling on molars when it is impossible to determine whether the filling is on the facial or lingual surface). Note: This code is used differently when coding dental characteristics for Unidentified Persons.
/	A portion of the tooth is remaining and treatment has probably been accomplished on the tooth but it is impossible to determine which surfaces have been restored. This code is most frequently used when a tooth has had an endodontic procedure accomplished and the clinical crown has fractured off. This code is seldom used in coding missing persons dental information. Note: This code is used differently when coding dental characteristics for Unidentified Persons.
X	Missing. Tooth has been extracted or is congenitally missing.
M	Mesial surface of the tooth has been restored.
O	Occlusal or Incisal surface of the tooth has been restored.
D	Distal surface of the tooth has been restored.
F	Facial or Buccal surface of the tooth has been restored.
L	Lingual surface of the tooth has been restored.

Secondary Dental Codes - *Cannot be used independently. Must be used in conjunction with Primary codes.*

Code	Description
C	Any laboratory processed restoration including crowns, inlays, onlays, and veneers. This code also includes prefabricated restorations such as stainless steel crowns, metal and acrylic temporary crowns, and porcelain processed veneers.
R	Root canal. Evidence is available to establish that an endodontic procedure has been started or completed.

Common Coding Rules and Interpretation Issues with Examples

Issue	Description	Example
<p>No Records Regarding the Condition of Some Teeth</p>	<p>The default code for missing person dental records is V. If no information is available for a particular tooth or teeth, it is assumed that they developed and were unrestored.</p>	<p>The only records received for analysis are bitewing-type X-rays. There is no information concerning the anterior teeth and the wisdom teeth. The appropriate code entries for these teeth are:</p> <p>01V 32V 06V 27V 07V 26V 08V 25V</p> <p>09V 24V 10V 23V 11V 22V 16V 17V</p>
<p>Multiple Restorations on One Tooth Surface</p>	<p>Only one surface code is entered for a particular surface on a specific tooth regardless of the number of restorations on that particular surface.</p>	<p>Tooth #28 has two occlusal pit restorations, the appropriate code entry: 28O.</p>
<p>Deciduous Teeth</p>	<p>Deciduous teeth are coded in the same manner as permanent teeth. When the available dental records are in the mixed dentition phase, the examiner must establish the likelihood of the deciduous tooth being exfoliated and replaced by the permanent tooth during the time interval between the date of the last dental record (written/radiograph) and the date the individual went missing. For the purposes of NCIC coding, the general rule is: Unless there is evidence to the contrary, it is assumed that all deciduous teeth will be replaced by permanent teeth at 11+ years of age. When in doubt, use the default V code.</p>	<p>#1: The most recent available dental records are of the individual at 7 years of age and indicate a MOD restoration on the lower right second deciduous molar. The individual went missing at 9 years of age. The tooth should be coded: 29MOD</p> <p>#2: The most recent available dental records are of the individual at 9 years of age and indicate a MOD restoration on the lower right second deciduous molar. The radiographs show evidence of a permanent successor. The individual went missing at 16 years of age. The tooth should be coded: 29V</p> <p>#3: The most recent available dental records are of the individual at 10 years of age and indicate a MOD restoration on the lower right second deciduous molar. The radiographs clearly show no evidence of a permanent successor. The individual went missing at 16 years of age. The tooth should be coded: 29MOD</p>

Common Coding Rules and Interpretation Issues with Examples

Issue	Description	Example
Fixed Dental Bridge	The important feature is that the tooth has been extracted.	Tooth #8 has been extracted and replaced with a fixed bridge. Teeth #7 and #9 are the abutment teeth and restored with full coverage porcelain to metal crowns. The teeth should be coded: 07MODFLC 08X 09MODFLC
Dental Implant	The important feature is that the tooth has been extracted.	Tooth #8 has been extracted and replaced by a dental implant. The tooth should be coded: Dental Report, Section 2 - 08X Dental Report, Section 4 - Implant 08
Removable Dentures	All teeth that are replaced by a complete or partial denture are coded as X in Section 2 of the dental report, and the appropriate notation should be made in Section 4.	“Complete Maxillary Denture”, “Complete Mandibular Denture”, “Partial Maxillary Denture”, and/or “Partial Mandibular Denture.”
Overdenture Teeth	All missing teeth are coded with X. For the purposes of NCIC coding, the overdenture teeth are assumed to have endodontic treatment and some sort of cast coping.	Teeth #6 and #11 are overdenture teeth for a complete maxillary denture. These teeth should be coded: Section 2 - Missing teeth coded X 06MODFLCR 11MODFLCR Section 4 - Complete Maxillary Denture, Overdenture 06, Overdenture 11
Orthodontic Appliances (Active and Passive)	All teeth are coded for their dental characteristics and a notation should be made in Section 4 of the dental report	Section 4 - “Orthodontic Appliance”
Pit and Fissure Sealants	Pit and fissure sealants are not considered restorations for the purposes of NCIC coding.	All teeth that have pit and fissure sealants are coded V .

Common Coding Rules and Interpretation Issues with Examples

Issue	Description	Example
Facial or Lingual Restoration	Sometimes it is impossible to distinguish if a restoration is on the facial or lingual surface. Review the written records to help determine the position or extent of the restorations observed on the x-rays. If it is impossible to determine which surface contains the restoration, the appropriate NCIC code is V . Otherwise, code only the restored surfaces that can be reasonably identified.	#1: A pit restoration is observed on tooth #19. It is impossible to determine whether it is on the facial or the lingual surface. The tooth should be coded: 19V #2: A restoration is observed on tooth #14. It appears to be an Occlusal restoration that extends either to the facial or lingual surface, but the extension location cannot be determined. The tooth should be coded: 14O
Missing Premolars (Bicuspid)	Determining which premolars were extracted may be difficult, particularly following completion of orthodontic treatment. Careful examination of the radiographs and written treatment records is often helpful in making this determination. For the purposes of NCIC coding, if it is impossible to determine which premolars were extracted, the appropriate code is V .	If it is impossible to determine which premolars were extracted, the appropriate code is V .
Anterior Composite Restoration	The coding of restored surfaces on anterior teeth should be conservative when interpreting dental records for a missing person.	A small mesial restoration is observed radiographically for tooth #8. The written records indicate a mesiolingual restoration was placed on the tooth. The tooth should be coded: 08M
Extent of Large Restorations	Coding surfaces on restorations that appear to be quite extensive on x-rays can be difficult. A review of written treatment records may clarify the actual surfaces that have been restored. Code only the surfaces that show evidence of being restored.	X-rays indicate a large build up type restoration on tooth #19. The written dental records do not indicate which surfaces have been restored. The radiographs, however, indicate obvious restorations on the mesial, occlusal, and distal surfaces. The tooth should be coded: 19MOD

Entry Rules for NCIC Dental Characteristics

The following rules apply to **each tooth** for the successful entry of dental characteristics into NCIC:

1. The DCH Field requires that a code or series of codes be entered for each tooth. The tooth number (01–32) must be followed by option A, B, or C:
 - A. One special character /, or one special character / followed by R.
 - B. One alphabetic character M, O, D, F, L, X, V.
 - C. Two to seven alphabetic characters M, O, D, F, L, C, and R.
2. Any combination of M, O, D, F, L should be entered in the sequence of M, O, D, F, L.
3. The R character should follow any combination of M, O, D, F, L, C or the / character.
4. The C character should follow any combination of M, O, D, F, or L.
5. The only character that should be used with / is the R character.
6. The characters V and X should not be used with any combination of characters.
7. The characters M, O, D, F, L, C, R, /, V, and X may be used only once per numeric.

If you have any questions regarding the reporting of a condition, contact the **FBI's CJIS Division at (304) 625-3000**.

Thank you for your careful completion of this report. Please be sure to retain all dental records on the missing person for future comparisons, or if you desire, you may release the records to the parent(s) and/or investigating agency. The family and friends of your patient are extremely grateful for your assistance.
